

nur

You want the best overcoat your money will buy, of course; and means allwool fabrics, high class tailoring, a perfect fit; and the style that suits

Here's the Hart, Schaffner & Marx Chesterfield: it answersall the requirements except possibly the last; you can settle that by looking at yourself in the coat.

This style suits a large percentage of wearers; it's dignified, dressy, suitable for any and all occasions. If it doesn't suit you we have other styles that will.

CHAS. F. KINKEAD.

CHAS. F. KINKEAD, Sheriff of Lafayette County, Mo.

Vices in Horses.

One so frequently hears it stated that such and such a horse is vicious, that it appears almost a superfluous admission of ignorance to make the inquiry, 'What is vice?" Of course we shall be told that a horse that bites and kicks is vicious, and also one that has developed other undesirable habits; but a good many people go a long way further than this, and, one does not say always erroneously, characterize a propensity for shying and bolting, cribbing, etc. as vices.

Assuming in the first place and for the sake of argument, that they are so, it would be both interesting and instructive to ascertain the proportion of cases of inherited and acquired vices, and how many of each are the result of bad treatment, and how many of natural infirmity. Any reliable information on these points would be valuable to many horse-owners, as it would materially assist them in breeding operations, and also in their attempts to convert an unreliable horse into a steady one; and perhaps, therefore, some readers who have studied such matters, and are possessed of practical experience in dealing with equine vice may feel disposed to give others the benefit of their opinion.

So far as the writer is person-Court will proceed to hear the said petition ally able to express an opinion on the matter, and his inability to throw much light upon it is acknowledged, he is sure that such vices as biting are heredit ary. Otherwise it would be an any you have, why said report should not almost impossibly strange coincidence that so many members improvements and assessments therein of some equine families possess a propensity to use their teeth Witness my official signature and official or their heels far more frequent ly than those about them desire. At the same time it by no means necessarily follows that the son or daughter of a kicker should inherit the failing of its sire or dam. Possibly constitution or example may be responsible for the failing or vice, and to ascertain whether example has much to do with it, it would be useful mares that bite and kick are more numerous than the off Continued on page 8.
